BATCH 1
ASSIGNMENT 11

CODE:
```java
class Threading extends Thread{

        String str;
        Threading(String str){
                this.str=str;
        }

        public void run(){
                System.out.println(str);
        }

        public static void main(String[] args){
                Threading t1=new Threading("Threading 1");
                Threading t2=new Threading("Threading 2");
                Threading t3=new Threading("Threading 3");
                t1.start();
                t2.start();
                t3.start();
        }
}
```
